studios, photo lab and training area for Armed

Forces radio and television

Completion

180 Days

Pier & Beam
Permanent
Modular
Construction

- 5-year operating lease
- Full site development & restoration
- Stringent EPA requirements

Housing studios, photography labs and journalism schools, the Defense Visual Information School (DVIS) was the Army's primary facility for all forms of media training. Ramtech's product and expertise was ideally suited for this fast-track project. Coordinating with the Corps and Maryland EPA, Ramtech developed the site and constructed / installed phase one. The successful execution of phase 1 lead the Corps to simply issued a change order for the second phase.
